NO he his NOT nice, & a nut. HE has filed charges against me with police & told police Will has physically assaulted him many many times. He states he will destroy US & the organizations & that he has ALL the evidence etc.

I expect as soon as he gets to a place with wifi & an computer he will proceed with insane lies & such. He has ALL files, we have nothing. He had every intention to steal things, his house was full of every CD, Book, ETC we have in inventory, & records, & such. And that card in his wallet to contact IRS & his password he stated he has been using for months, makes it very clear he was a threat & enemy for a long time. He is a disturbed person with personality disorder who told locals he is the boss etc. Even the state trooper remembered him from when he showed up at their barracks & announced he was new guy in charge at NA & that he was living up here & we were open for business again etc.. what a nut. The guy said he was VERY chatty, gave out lots of info & this made them think he was a NUT. as they know we would be private & discrete.

He really did bad things, & had all these months of access to eVERYthing here, all files, all records & he put it all in that computer as he showed me. He even tried to show it to the State trooper, who told him he was not interested.. But I expect this is going to be a hell storm on internet, going to enemys & gov, & hate watch groups.. as he acts like a child & now needs to break the toy that was taken away from him he claims was his. a nut.

he even tried to show troopers INJURYs, marks on him of current & past assaults. All are lies. NOTHING ever happened. Then when will drove his truck past him to make copies of the contract he wrote up to have him sign in front of troopers, as bobs house. He was screaming like a demented child that will tried to run him over & stated he wanted charges pressed against will & have him arrested for a threat to his life. They laughed at him. But this is Randolph mind set.

And he threatened both of us in front of the officers. And certainly can harm me with my husband & interfere with my ability to see my kids. The officer was nice, but Randolph told them I threatened him with a gun. Which is BS. HE burst into my office, when will was gone, & was ranting U cant stop me, U can't stop me, the police are on their way, & U 2 are going to be arrested, I am going to shut this all down. I have will by the balls etc. I am in charge, I am in control. I was sitting & couldn't get out of office, he came behind the desk & stated if I stopped him from making a phone call it was "obstruction of justice" & he just repeated this over & over. I told him I did not think he knew what that means, & unhooked the phone cord. He then took laptop & bag that had Wills property, computer etc.. & ran up hill to farm house & through woods & blabbed like a lunatic to the neighbors he was assaulted etc.. & needed to call police etc.. he is a NUT, really insane. who knows what he told neighbors.

He was all twitchy, & cops pointed that out too. They said they did not believe he was mentally stable. they said they were surprised we let a person like that "get through the interview process" & be up here. They were concerned about My & bobs safety & wanted to make sure we had a landline up at the house. They said to call them if anything happens. They were very nice, good folks that responded, & said to call them even if hear noise or are concerned.

They stated they will see about getting a warrant out on Randolph as a deterrent, as the destruction of the laptop data is a crime in WV. And that is the best waY WE can protect ourselves legally, publicly, civilly is if HE was charged with something, proves he was in wrong, knew it was wrong etc.

Will left right after he got off the phone with you as promised & will be home soon.

Thanks for the egg carton. We are doing garden first.. then later build chicken house & get some egg laying hens. But I guess in my mind Mike can't move up here soon enough.

We have already had Keven block him from the webforum etc. & he will back up & save all his posts (incase we need evidence of his activities). But Will says as of this moment, for us not to make any moves on internet yet against Randolph, but to keep an eye out for any info, postings, that he may do.. then work something out.

I will lock up the office & head to bobs in about 30 minutes.

Thanks for all your help today getting all those things to us so quickly. Great help.

Thanks

oh, my God! But why Will just told me that everything is fine? I asked Will's permission to write to R. [REDACTED] was always nice with me. I still hope that R. is not so mean. I asked Dr.Bob, if he think R. would harm NA? He said he doesn't think so.

I will not write to him anymore, of course, thank you, Garland!

Sveta, do NOT email RAndolph anymore. What U sent him has several section that may HURT us. As we made him sign a contract today to get the car. He wiped the harddrive clean & destroyed ALL files. So we have NONE & HE has copies of everything. His password on the computer he had to tell us in from of the officers was "FUCKWILL". He is a criminal, traitor, threat & he has pressed legal charges against both Will & I we now have to defend. They are lies, but he filled them & he threatened in front of them he is going to sue ALL of us in Civil Court & is sending all those files to IRS, FBI, DHS etc.. & he is sending everything to the world via the internet & will destroy all of these organizations!

He is a terrorist, criminal, had this planned for a while, & in his wallet I found a 3x5 card in his handwriting with the IRS criminal hotline phone numbers & email to get us busted & have this land seized! understand. HE has been an infiltrator, back stabber, criminal, thief, scum, nutbag, insane, unstable, hobbyist, who had access to WAY too much for way to long with no leash
